An authorized servicer will have the service manual and is a little less likely to actually test and troubleshoot, instead of just throwing in parts until it works. WereAlways unplug a microwave before removing or installing any bulbs. IfThere may be a panel on the bottomIf not, chances areIf you dont have your instructions, please reply back with your brand and model number. Once its out of the wall, the outer cover wrapper will need to be removed, just as youll need to do on a counter top model. TheBe sure to put all the screws back in the right holes, since some may be special grounding screws. Bulbs can be had in most grocery stores, hardware stores, home improvement centers, and big box or department stores. Many models use halogen lamps. You must not touch the new one with your bare skin, as the oils will shorten the bulb life. Were happy to help you with free advice and wed appreciate your thoughtful rating of our answer. Passive Infrared and microwave processing provides excellent catch performance with freedom from false alarms. Alarm signals must meet the signaling requirements of both technologies to activate an alarm. Adjustable PIR and microwave sensitivity. Adaptive processing adjusts to background disturbances. This helps to reduce false alarms while maintaining catch performance. It will not alarm on extreme levels of thermal and illumination disturbances caused by heaters and air conditioners, hot and cold drafts, sunlight, lightning, and moving headlights. Provides three sensitivity settings. This provides immunity to false alarms while maintaining proper catch performance of human targets.
